4 new Google Antrow MS-Access web controls

Current News

Friday, December 20, 2019 4 new Google Antrow MS-Access web controls

We are happy to announce that we now have 4 new Web controls for our MS-Access to Web app conversion engine.

1) You can now use Google accounts to Authenticate and secure access to your web application
2) Show maps depending on your data
3) Calculate the best driving Directions service (Autoroute) with waypoints with your database data solving the "Travelling Salesman" problems
4) Show outdoor maps with elevation information
5) Integreate Google Street view

For an online demo please go to http://demo.antrow.com -> Antrow .Net MS-Access web controls
