Monitoring the POS environment

Product Information

Monitoring the POS environment

With our monitoring solution you never lose track of your POS status.
Always stay informed about the status of mission-critical services. Such as Network problems, forgotten cash accounts, POS system overheating, stopped SQL services and much more can be detected early before trouble occurs.
With your individual monitoring solution we provide you with the basis for optimization, quality improvements and significant time and cost savings. We offer a reliable and comprehensive control over your environment and your Hiltes® network.
We offer a sophisticated, tailored to your personal needs, server, process and client monitoring system - either as a service or as a ready-configured system at your location. You have access you to monitor systems in the house of your PC, using a surveillance monitor or on the go with your iPhone, iPad and Android.
