Product Information

Return on investment (ROI) on a MS-Access migration to a Webapp

Many people have asked us what are the added values (ROI) when you decide for a migration of your Microsoft MS-Access database to a Web App with Antrow software:

We have collect some answers below.

Q: Does it save me money to migrate?

A: Yes first of all you don't need an Microsoft Office License for each user that uses the application, you can add so many users as you want without any extra cost. Also your IT Department don't need to rollout the MS-Office Application application to each PC.

Q: Do we have problem when our IT department upgrade our MS-Office version or change to a cloud solution.

A: No, your migrated application work totally independent from your office PC, all your need is a web browser.

Q: What about the data, can they be used by everyone?

A: Yes your migrated MS-Access database is a true client server application where the data is stored centrally

Q: Can the application be used on an IPhone and IMac?

A: Yes all your device need is a browser

Q: How do we secure the user access to the application?

A: You will get our build in user authentication system for free, here you can manage user, access rights etc.

Q: Do we have to use Antrow as a cloud provider?

A: No, we support any major cloud provider (Google/Amazon/Microsoft) or ISP provider or you can install the application on your own infrastructure.
