

Convert your Microsoft Access application to a Web Application

Microsoft Access is a database management system (DBMS) from Microsoft that combines the relational Microsoft Jet Database Engine with a GUI graphical user interface and software-development tools. It is a member of the Microsoft Office 365 Professional suite of Microsoft desktop applications.

Lots of our clients organize their business or even sell solutions based this great tool from Microsoft.

But in world of cloud computing, web and mobile devices, different platforms such as Apple IOS and Linux the reach and usage of these Windows Desktop-based tools declines.

Our Customers and their Users require web-based applications, to ensure to have 24/7 access to the application from anywhere.

Antrow Software can take your MS Access application to the web
