

Which scanner are recommended to achieve the best possible results with BarcodeOCR?

Product Information

Which scanner are recommended to achieve the best possible results with BarcodeOCR?

Which scanners are recommended for achieving the best possible results with BarcodeOCR? In principle, all scanners are supported. To use all the features of BarcodeOCR, however, we recommend working with a high-quality scanner that can process several documents in the network quickly and automatically. The scanner should deposit the scanned documents on the server in one piece as a PDF
