

What are the steps to Migrate you MS-access database to a Web App with the services from Antrow Software?

- 1) You send us a copy of the MS-Access application, if can be either with or without your data
- 2) We migrate the data from MS-Access to a SQL Server, here we also optimize indexes and table design
- 3) The forms are then converted into Mobile First HTML5 pages
- 4)The code behind will be converted to ASP.net and JAVA Script
- 5)The MS-Access reports will be converted into PDF Reports
- 6)Our user Access framework will be added to the application to ensure that only authorized user have access

What do you need to run the application after a migration?

- 1)A MS-SQL Server, usually free SQL Server Express edition is more than enough.
- 2) A hosting Server, it can be either locally installed or you can choose a hosting provider of your choice, the application is running on Microsoft Internet Information server 9.0 or better
- 3) The migration application is 100% License free, you only pay the migration fee
